

The following is a list of Panorama Work Type codes. Work Types are automatically assigned to tasks generated by the system.

When adding a manual task, a Work Type must be selected. The Work Types highlighted in the list below are the most commonly used in Investigation and Outbreak.

Note: adding a Work Type to a manual task **will not** create a hyperlink to an event in any other module.

Abbreviation	Description
AE	Adverse Event
ASC	Adverse Storage Event
AUTO	Auto Decrement Inventory
CRIR	<i>unknown</i>
CFU	<i>unknown</i>
CM	Client Merge
