

Investigation and Outbreak Management

June 19 2019

To: IOM WG members

Please distribute to IOM nurses within your zone

There is a known constraint when viewing risk factors pertinent to investigations. You will only see the pertinent to investigations specifics for investigations where the responsible organization (PHO) on the investigation is the same as yours.

Example 1 – Logged in as a Halifax User. The responsible organization on the investigation that the risk factors are pertinent to is the same as your PHO

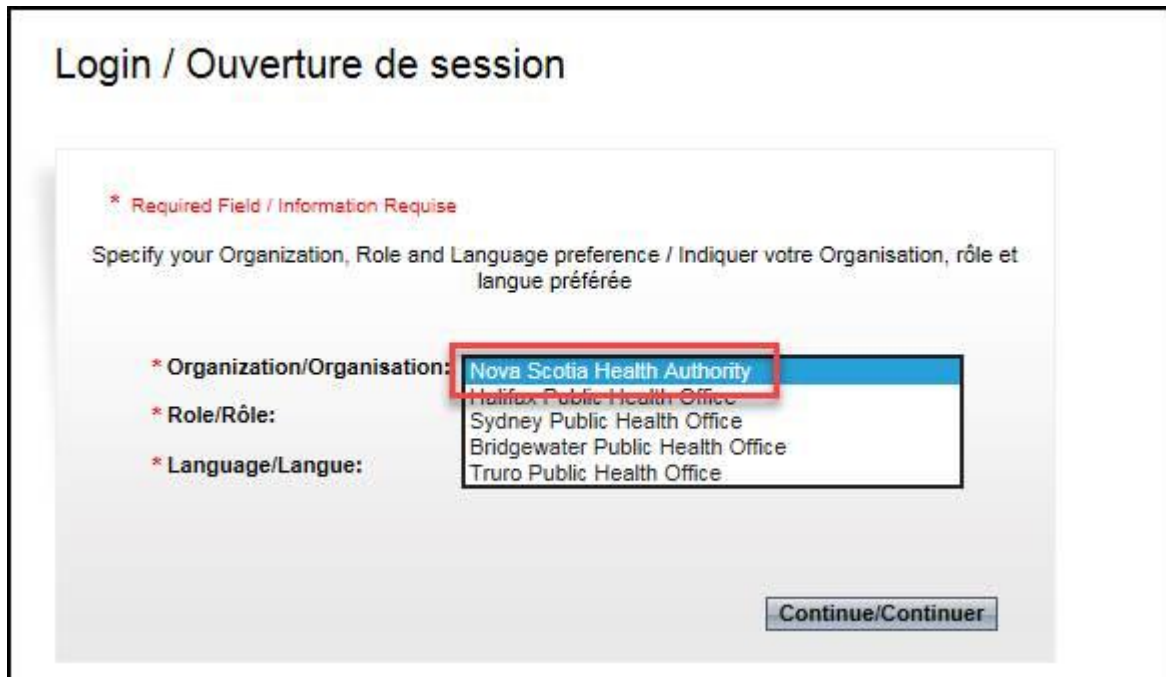

<input type="checkbox"/>	✓	Exposure - History of residence/travel in endemic country	2019 Jun 12	Yes		
<input type="checkbox"/>	✓	Exposure - Occupational - contaminated blood, body fluids	2019 Jun 12	Yes		
<input type="checkbox"/>	✓	Exposure - Occupational - unknown contamination	2019 Jun 12	Yes		

Example 2 – Logged in as a Truro User. The responsible organization on the investigation that the risk factors are pertinent to are not the same as your PHO. You know that they are related to an investigation because they have a reported date and response.

Risk Factor ▲	Additional Information ◇	Reported Date ◇	Response ◇	Frequency ◇	Date Range ◇	End Date Reason ◇	Pertin Invest
Behaviour - Smoking / vaping / use of smoking paraphernalia		2018 Nov 02	No				
Chronic liver disease		2018 Nov 02	Yes				
Exposure - Animal - contact with pets, farm, petting zoo, or wildlife		2018 Nov 02	No				

A workaround has been implemented. All IOM nurses have been setup with the NSHA organization. You change your role to the NSHA organization if you need to see what investigations (that have a responsible organization different from yours) are pertinent to the client that you are viewing.

Change Role – you role

Example 3 – Logged in with the NSHA user role. Can see all pertinent to investigation info:
 Responsible org for 1130 is Sydney
 Responsible org for 735 is Halifax
 Responsible org for 1131 is Truro

<input type="checkbox"/>		Exposure - Contact - contact with a case (confirmed, probable or suspect)		2018 Nov 02	Yes
<input type="checkbox"/>		Exposure - Contact - contact with a case (confirmed, probable or suspect)		2018 Nov 02	Yes
