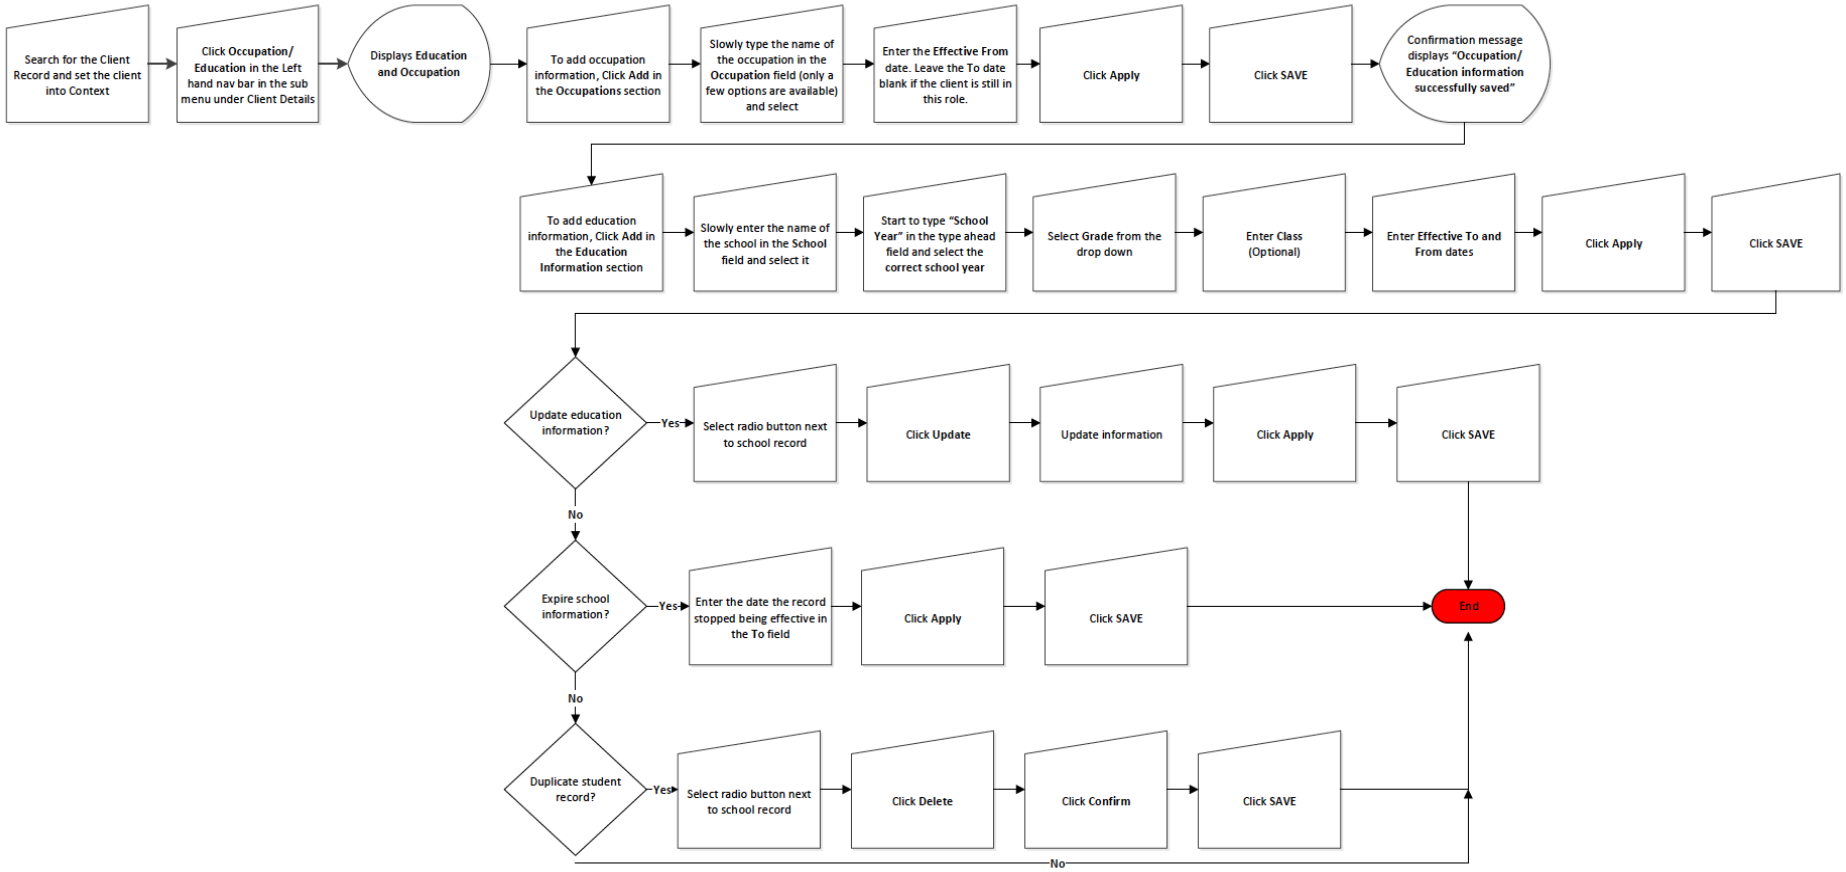
Education and Occupation – QRC 1.4



Points to Remember

- School class lists from the Nova Scotia School Information System (NS-SIS) are loaded into Panorama and updated monthly. Do not add education records for public or home schooled students.
- Education records can be added for private schools.
- Set to the “To” date to the end of the school year if you want the record to expire automatically at that time. This way it’s ensured that reports using school information will not include the outdated information.
- Only a few relevant occupations are available to add, e.g., Health Care Worker.
