

Lab Quick Entry – QRC IOM 101-2.1

Points to Remember

- Lab Quick Entry is limited to entering simple results for a single subject.
- Client context is required for this screen.
- If an Investigation is in context as well, the lab information will be automatically associated to that investigation.
- At any time, click the **Clear** button to clear all entry fields and set them back to their default values.
- It is possible to enter multiple tests and results while on the Lab Quick Entry screen.
- Negative results entered into Panorama will be limited to those lab results received in the context of contact tracing.
- Service Delivery Location should be the Public Health Office receiving the lab.
