

Requisition View, Lab Report View, Update, Delete – QRC 101-3

Points to Remember

- The Lab Summary list provides summarized and detailed views of lab tests and results for the client and investigation in context.
- Click the + icon for the row of interest to view expanded details.
- Click the – icon to hide the expanded details.
- The lab Requisition screen **will not** be used in Nova Scotia.
- A lab report can be associated with one or more tests which are associated with one or more results. On the Lab Report screen, a user can view the tests and results associated with a specific lab report.
- The View/Update Report button will be disabled if the selected lab entry has no report.
- At any time, click the **Reset** button to discard all changes and return the fields to their last saved values.
