

## Working with Lab Tests – QRC IOM 101-4.4

### Points to Remember

- The **Result Details** section of the Lab Report screen remains hidden until the Test ID hyperlink of one of the tests is selected.
- Tests with results **may not be** deleted. Deleting the test only removes it from the lab report; it will remain on the associated requisition. A test can be withdrawn.
- The **Unlink from Investigation** feature is available only if the current subject has an investigation record that the test can be linked to.
- Clicking on the Pertinent Investigation hyperlink displays the Investigation Summary screen of the specified investigation.
