

Record Unidentified Signs & Symptoms Counts – QRC OTB 101-6.2

Points to Remember

- The counts are recorded by outbreak group for signs and symptoms identified in the **Sign and Symptoms Presets** screen.
- The counts recorded here display on the **Sign & Symptom Counts** screen along with counts of signs and symptoms for identified investigations.
- Unidentified counts can only be added for the predominant disease on the Outbreak.
- The Population Denominator is shared between the Outbreak Groups screen and the Record Unidentified Counts screens. The population denominator can be updated on the Outbreak Groups or the Record Unidentified Counts screens. Updates made to the population denominator on any of these screens will appear on the Outbreak Groups screen and the Record Unidentified Counts screens.
