

Panorama Tips and Tricks #28 Entering Flight Information

Prior to documenting flight information you would document travel under risk factors related to the client

- 1) Indicate travel under Risk factor section and click the radio button next to the appropriate one and update with info

The screenshot shows the 'Risk Factor' interface. At the top, there are buttons for 'Update', 'View', 'Delete', 'Set Response', and 'Set Pertinent'. Below this is a table with columns: 'Preset', 'Risk Factor', 'Additional Information', 'Reported Date', 'Response', 'Frequency', 'Date Range', 'End Date Reason', and 'Pertinent to Investigation'. Three rows are visible, with the second row ('Travel - Outside of Canada') selected. Below the table is the 'Update Risk Factor' dialog box. It contains a dropdown for 'Risk Factor' (set to 'Travel - Outside of Canada'), a checked checkbox for 'Risk Factor Pertinent to investigation in context', a text area for 'Additional Information', and several dropdown menus for 'Response' (Yes), 'Frequency' (Single event), and 'Reported By' (Client). It also includes date pickers for 'Effective From' (2019/04/28), 'Effective To' (2019/05/04), 'End Date Reason' (No longer applicable), and 'Reported Date' (2019/05/09). 'Apply' and 'Reset' buttons are at the bottom.

To capture flight information you would do this within your TE (Transmission event) or AE (Acquisition Event) depending on the situation

Transmission Event related to flight	Exposure Event related to flight
Client diagnosed with measles and during infectious time was a passenger on a plane	Client is diagnosed with measles and in looking at potential exposures discovered they were on a flight with a case of confirmed measles. Most likely place they contracted the disease.

NOTE: If a client travels and returns home with an enteric illness unless they had symptoms on the flight that would have exposed other passengers to the illness and /or was exposed to an enteric illness on a flight and became ill from that you do not have to complete flight information. You would have to complete information on resorts/restaurants if applicable.

Acquisition start/end denote the first and last possible times acquisition could have occurred.

* Acquisition Start: / / : :ADT Estimated

Acquisition End: / / : :ADT Estimated

Exposure Duration: 7 Hours

Panorama Tips and Tricks #28 Entering Flight Information

The flight number and seat (if applicable) is captured in Exposure location. You may need to open this field by clicking Show Exposure Location

- Exposure Location Name- Flight Number and seat
 - Westjet 236, seat 3c
- Exposure Setting type- Transportation
- Exposure Setting – Airplane
- Country- Country of flight Departure
 - If the flight departure is in Canada you will be able to fill in Province etc
 - If outside of Canada you can free text Airport details if have them. Once you change the Country the address will open up for free text of address
